A GREEN PLAN for LIGHT COLLECTIVE by Campbell Watt (aged 12)

1   Work out the carbon footprint for your business and offset it.

       www.treesforlife.org.uk/support/for-businesses/carbon-offsetting/

2   Use a search engine that runs on 100% renewable energy where every search is offset.

       www.ecosia.org

3   Reduce/stop flying. Fly with companies that are carbon aware. Use public transport.

       www.telegraph.co.uk/travel/advice/reduce-carbon-footprint-flying/

4   Reduce in-person meetings, use apps like Skype, Zoom, Wherby…

5   Always have a reusable water bottle/coffee cup with you.

6   Look at the big stuff like heating and lighting - use natural light and get an energy monitor to see what you use.

7   Look at the small stuff - your pens, your batteries and your paper…

       www.seltzergoods.com/pens-and-stationery/seven-year-pens

8   Reduce, reuse and recycle:

       Get second hand furniture
       Use a compost bin for food waste
       Introduce recycling bins
       Donate old electronics
       Turn off your laptop/use sleep mode
       Refill your ink cartridges
       Only print essential stuff
       Buy refurbished tech
       Use email only
       Remove yourself from snail mail lists
       Get paperless billing
       Use cloud data

9   Work from home.

10   Seek out green vendors and source goods and services that are produced and supplied sustainably.

11   Use green cleaning products - try vinegar!

12   Have a local/organic lunch.

13   Get plants in the work space.

14   Do stuff with the community.

15   Add a green reminder in email signature to your company policy.

16   Eat less meat.
